Forecast for Saturday 05 Feb 2022

Weather: A cloudy and cold day with outbreaks of rain developing through the morning, some this will be heavy. Rain will turn to wet snow on the highest tops through the afternoon, with snow falling down to 600 metres after dark. Precipitation tending to ease from the north in the evening.

Chance of cloud-free hill tops above 700m: 20%, best chance of breaks across the east of the Park first thing in the morning.

Low cloud and visibility: Becoming widely poor in cloud down to 700 metres by late morning, with patches down to 500 metres across western upslopes.

Meteorologist's View

Low cloud and upland gales making for navigational difficulties. Rain and wind will lead to drenching conditions at times along with significant wind chill.

Forecast for Sunday 06 Feb 2022

Weather: A bright and cold day with the chance of a few passing snow or hail showers, but more in the way of drier weather developing in the afternoon and evening. Bitterly cold in the strong summit winds, severe wind chill.

Maximum wind: Westerly 30 mph with gusts to 50 mph on the tops

Chance of cloud-free hill tops above 700m: 80%

Low cloud and visibility: Generally very good with good air clarity, dropping quickly as any snow showers pass by. Some patchy cloud above 800 metres but summits often clear of cloud

Temperature: **Valleys:** Zero rising to 5 Celsius
At 700m: Minus 1 Celsius
Freezing level: 600 metres
